Ι,	, certify that I have measured this trophy on PRINT NAME	/DD/YYY	YY
at	EET ADDRESS CITY	STATE	E/PROVINCE
	t these measurements and data are, to the best of my knowledge and belief, made in accordance with the inst	ruction	s given.
Witness	s: Signature: B&C OFFICIAL MEASURER		
IN	STRUCTIONS FOR MEASURING NON-TYPICAL WHITETAIL AND COUES	d' DE	ER
steel ca measur A. B. C. D.	measurements must be made with a 1/4-inch wide flexible steel tape to the nearest one-eighth of an inch. (Not able can be used to measure points and main beams only.) Enter fractional figures in eighths, without reductio rements cannot be taken until the antlers have air dried for at least 60 days after the animal was killed. Number of Points on Each Antler: To be counted a point, the projection must be at least one inch long, wit exceeding width at one inch or more of length. All points are measured from tip of point to nearest edge of b trated. Beam tip is counted as a point but not measured as a point. Tip to Tip Spread is measured between tips of main beams. Greatest Spread is measured between perpendiculars at a right angle to the center line of the skull at wides whether across main beams or points. Inside Spread of Main Beams is measured at a right angle to the center line of the skull at widest point be beams. Enter this measurement again as the Spread Credit if it is less than or equal to the length of the long greater, enter longer antler length for Spread Credit. Total of Lengths of all Abnormal Points: Abnormal Points are those non-typical in location (such as poin from a point or from bottom or sides of main beam) or extra points beyond the normal pattern of points. Meast manner and enter in appropriate blanks. Length of Main Beam is measured from the center of the lowest outside edge of burr over the outer side to distant point of the main beam. The point of beginning is that point on the burr where the center line along the beam intersects the burr, then following generally the line of the illustration. 1-12-3-4-5-6-7. Length of Normal Points: Normal points project from the top of the main beam. They are mearest edge of main beam over outer curve to tip. Lay the tape along the outer curve of the beam so that the tape coincides with the top edge of the beam on both sides of the point to determine the baseline for poin ment. Record point lengths in appropriate blanks. 1-2-3-4. Circumference	n. Offich the local and as st part, tween it er anti- ts originate in the mone oute the etop entime as g, take	ength ength illus- main er; if inating usual est r side of ed from dge of sure-
	ENTRY AFFIDAVIT FOR ALL HUNTER-TAKEN TROPHIES		
	purpose of entry into the Boone and Crockett Club's® records, North American big game harvested by th ng methods or under the following conditions are ineligible:	e use c	of the
II. IV. V. VI. VII.	Spotting or herding game from the air, followed by landing in its vicinity for the purpose of pursuit and so Herding or chasing with the aid of any motorized equipment; Use of electronic communication devices, artificial lighting, or electronic light intensifying devices; Confined by artificial barriers, including escape-proof fenced enclosures; Transplanted for the purpose of commercial shooting; By the use of traps or pharmaceuticals; While swimming, helpless in deep snow, or helpless in any other natural or artificial medium; On another hunter's license; Not in full compliance with the game laws or regulations of the federal government or of any state, provior tribal council on reservations or tribal lands;		
ment, I will not	y that the trophy scored on this chart was not taken in violation of the conditions listed above. In signing understand that if the information provided on this entry is found to be misrepresented or fraudulent in a be accepted into the Awards Program and 1) all of my prior entries are subject to deletion from future ed ds of North American Big Game 2) future entries may not be accepted.	ny res	pect, it
